---

## Professional Summary

Full-stack software engineer with 14+ years of experience designing, building, and scaling SaaS platforms, enterprise applications, and cloud-native systems. Proven track record leading cross-functional teams, architecting scalable software solutions, and delivering high-impact products across manufacturing, healthcare, e-commerce, marketing, and SaaS industries. Expertise spans modern front-end development, back-end architecture, cloud infrastructure, DevOps, and systems administration from concept through deployment and long-term optimization.

---

## TECHNICAL SKILLS

### Core Technologies

React • Next.js • TypeScript • JavaScript • Node.js • Laravel • PHP • GraphQL • AWS • Docker • Kubernetes • PostgreSQL • MySQL • WordPress • Shopify

### Additional Expertise

System Architecture • SaaS Platforms • DevOps • CI/CD • Linux Administration • Performance Optimization • Application Security • Manufacturing Systems • Business Process Automation • Technical Leadership

---

## PROFESSIONAL EXPERIENCE

### Senior Software Engineer

**STRS Development** | Remote
**February 2025 – Present**

Lead engineering efforts for SaaS products and enterprise software platforms, delivering scalable applications and cloud-native infrastructure solutions.

- Architect and deliver modern SaaS applications using React, Next.js, TypeScript, Node.js, Laravel, GraphQL, and REST APIs.
- Design and maintain AWS-based infrastructure leveraging Docker, Kubernetes, and automated CI/CD pipelines.
- Improve application scalability, deployment reliability, database performance, and security across multiple product lines.
- Develop integrations and automation tools supporting manufacturing operations and business process optimization.
- Collaborate with product, design, and operations teams to deliver high-quality software solutions.
- Mentor engineers, conduct code reviews, and establish development standards and architectural best practices.

**Notable Projects**

- Strider Intel
- Canopy
- Suralink

**Technologies:** React, Next.js, TypeScript, Node.js, Laravel, GraphQL, AWS, Docker, Kubernetes, PostgreSQL

---

### Lead Software Engineer

**C Squared Social** | Remote
**September 2023 – January 2025**

Led development and technical strategy for enterprise web platforms, custom applications, and large-scale WordPress implementations.

- Directed application architecture, infrastructure planning, CMS strategy, and development workflows.
- Built custom integrations, themes, and scalable hosting environments for enterprise clients.
- Partnered directly with stakeholders to define requirements and deliver business-focused technical solutions.
- Led projects from discovery and planning through deployment, optimization, and long-term maintenance.
- Improved accessibility, performance, maintainability, and operational efficiency across multiple platforms.

**Notable Projects**

- PBS Kids
- Kevin O'Leary
- The Piped Peony
- Yoli

**Technologies:** WordPress, PHP, JavaScript, AWS, MySQL, REST APIs, Docker

---

## Freelance Software Engineer

**9th South Digital** | Self-Employed
**January 2012 – January 2026**

Founded and operated a software consulting business delivering custom applications, SaaS platforms, enterprise websites, and e-commerce solutions.

- Led software projects from discovery and architecture through deployment and ongoing support.
- Developed scalable applications using React, Next.js, Node.js, Laravel, WordPress, and PHP.
- Managed cloud infrastructure, DNS, hosting environments, security, and Linux server administration.
- Implemented accessibility, SEO, and performance optimization strategies for clients across multiple industries.
- Advised organizations on technology decisions, digital transformation initiatives, and operational workflows.

- Trained clients and internal teams on CMS platforms, development workflows, and best practices.

**Technologies:** React, Next.js, Node.js, Laravel, WordPress, PHP, AWS, Google Cloud Platform, MySQL, PostgreSQL

---

## Senior Web Developer

**Arena LLC**
**September 2016 – August 2019**

Managed development operations and cloud infrastructure for political campaigns and enterprise organizations.

- Built and maintained high-traffic web applications and campaign platforms.
- Managed AWS infrastructure, deployment pipelines, hosting environments, and performance optimization initiatives.
- Led technical execution across development, infrastructure, deployment, and operational support.
- Ensured platform reliability and uptime during periods of significant traffic demand.

**Notable Projects**

- John Kasich Presidential Campaign
- Bruce Rauner
- Fix Illinois
- Scott Walker

**Technologies:** WordPress, PHP, AWS, MySQL, Linux, Nginx

---

## Web Developer

**Novarad**
**November 2014 – November 2016**

Developed HIPAA-compliant healthcare websites and patient-facing applications serving radiology facilities throughout the United States.

- Designed, developed, and launched secure healthcare websites and web portals.
- Managed projects from planning and development through deployment and support.
- Collaborated with marketing, leadership, and technical teams to execute digital initiatives.

- Maintained compliance, security, and usability standards within healthcare environments.

**Technologies:** PHP, WordPress, MySQL, HTML, CSS, JavaScript

### Junior Systems Administrator

**Bluehost**
**2012 – 2014**

Supported large-scale shared hosting and web infrastructure environments serving thousands of customer websites.

- Monitored and maintained 300+ production Linux web servers to ensure high availability and uptime.
- Performed server maintenance, kernel updates, migrations, and infrastructure support activities.
- Assisted engineering and technical support teams in diagnosing and resolving hosting, networking, and server-related issues.
- Supported DNS, email, web hosting, and Linux-based production environments.
- Developed a strong foundation in systems administration, hosting infrastructure, networking, and large-scale web operations.

**Technologies:** Linux, Apache, MySQL, DNS, cPanel, Web Cloud Hosting Infrastructure

---

## SELECTED PROJECTS

### Canopy

Enterprise SaaS platform serving accounting and tax professionals through workflow automation, client management, and operational tooling.

### Canopy - getcanopy.com

Enterprise SaaS platform serving accounting and tax professionals through workflow automation, client management, payments, and operational tooling.

### Strider Intel - striderintel.com

Manufacturing intelligence platform providing operational visibility, automation, and business process optimization tools.

### Suralink - suralink.com

Secure client collaboration platform used by accounting and audit firms to streamline document collection and communication workflows.

### PBS Kids - pbskids.org

Large-scale public-facing platform supporting educational content and digital experiences for millions of users.

### Kevin O’Leary - kevinoleary.com

Designed and developed web platform enhancements, custom integrations, and performance improvements for the entrepreneur, investor, and television personality's digital presence.

---

## CERTIFICATIONS

- CompTIA Security+
- CompTIA Network+
- CompTIA A+

---

## EDUCATION

Bachelor of Science in Computer Science

Utah Valley University
